## How to Order

GB/GFT Series terminal blocks are ordered by listing a composite number made up of the model designatin followed by the number of poles required for the applicaiton. Example: Type GBP 10-pole block becomes stock number GBP-10. Suffixes are used as follows:

A denotes model with No. 8-32 external screw terminal
C denotes model less mounting positions
X denotes model with thermoplastic molding
To specify quick-connect terminals, simply add the style number required. May be purchased factory-assembled or as customer-installed accessory.
The GBP-10 described above - made from thermo-set phenolic - less mounting positions thus converts to sock number GBPC-10.
